Sample report

Cornelius Hennch

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

This is the data

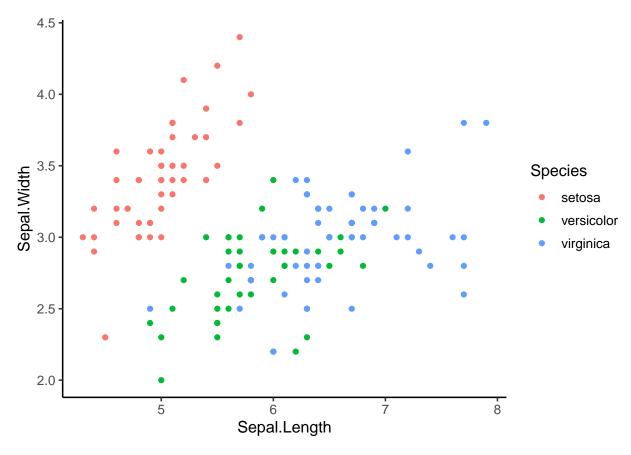

Let's examine the data first.

head(tar_read(data))

```
## # A tibble: 6 x 5
     Sepal.Length Sepal.Width Petal.Length Petal.Width Species
##
            <dbl>
                         <dbl>
                                       <dbl>
                                                   <dbl> <chr>
                           3.5
## 1
              5.1
                                         1.4
                                                     0.2 setosa
## 2
              4.9
                           3
                                         1.4
                                                     0.2 setosa
                           3.2
## 3
              4.7
                                         1.3
                                                     0.2 setosa
## 4
              4.6
                           3.1
                                         1.5
                                                     0.2 setosa
## 5
              5
                           3.6
                                         1.4
                                                     0.2 setosa
## 6
              5.4
                           3.9
                                         1.7
                                                     0.4 setosa
```

Stunning visualization

Let's visualize it.

The echo: false option disables the printing of code (only output is displayed).
